

Participate in our documentary by sending us a 3 minutes video of footage showing the issues around water in your country and their possible solutions.

We request an explanatory text to accompany the visuals with a clear name of the sender, the country of origin of the visuals and half a page describing the issue of water captured on the visuals and actual or possible solutions (if good practices exist and are filmed, even better).

Before June 14th please send both the visual materials and the text online through wetransfer.com on the following address: elena.zervopoulou@gmail.com or elena.z@onevibefilms.com so that we may have some time to preview them before selecting and integrating parts in our editing.

The desired format to send is .mp4 1920 × 1080, H.264. Please bring the same footage with you (make sure it is high quality, not low due to compressions) on a usb stick, we will collect them upon your arrival.

We will be holding a Participatory Video workshop for editing in parallel with the Congress (from 17th until the 20th of June) where we will be working with your footage with local citizens to reach a first rough cut by the end of our workshop. You will be notified as soon as we have the final cut with a link online to preview it.

Thank you for your collaboration!
